

PROJECT SNAPSHOT

ZHADORE

An AI-powered apparel design search engine where fashion meets technology.

PHASE 1 ACTIVE

Status: In Planning
Type: Web Application
Stack: Frontend + Backend
Current Phase: Design & Architecture
Next Phase: Checkout Integration

02 ELEMENTS — FRONTEND & BACKEND ARCHITECTURE

FRONTEND (Customer-Facing Pages)

- Homepage — Hero banner + search bar
- Browse / Search Page — Filter by theme, color, style
- Dress Detail Page — Full view, theme badge, description
- Theme Gallery — Visual mood board per vibe

BACKEND (Server & Data Layer)

- Product Database — Dress catalog w/ metadata
- Theme Engine — Maps vibes → dress attributes
- Search API — Query by name, color, vibe, style
- Admin Panel — Upload & manage dress listings

03 THEME SYSTEM — COLORS, DESIGN & VIBE

Each theme is defined by a mood name, color palette, texture, and dress style. Customers browse by vibe.

■ Sunset Vibe

Warm oranges & golds
Shiny, glitzy dresses — sequins & satin

■ Midnight Luxe

Deep purples & silver
Sleek velvet gowns & sparkle accents

■ Garden Fresh

Soft greens & blush whites
Flowy floral & linen summer dresses

*■ Frost Glam

Ice blues & pearl whites
Structured A-lines & sheer overlays

04 DEVELOPMENT ROADMAP (ADMAP Phase)

★ Planned post-website launch

- Shopping cart & wishlist
- Secure payment gateway (Stripe/PayPal)
- Order tracking & history
- Size selector & measurements guide
- Customer accounts & profiles
